

Character training vs base: persona-conditional trait vectors — Llama-3.1-8B-Instruct, layer 15

Heights are NOT comparable between arms — each arm's shared component differs and cosine is not invariant to it. Read the within-arm spread, not the between-arm offset.
Comparable version: arm_comparison_corrected_L*.png · diagnosis: confound_diagnosis_L*.png

A. Persona spread under each arm (layer 15)

B. Is the comparison licensed?
